SOLAÍS LIFESTYLE PLATFORM

Software Requirements Specification (SRS)

Part I – Business & Functional Requirements

Version 1.0 (Working Draft)

Prepared By: Tawanda Mkandawire

Table of Contents

• Chapter 1 – Introduction
• Chapter 2 – Business Analysis
• Chapter 3 – System Overview
• Chapter 4 – Stakeholder Analysis
• Chapter 5 – User Roles & RBAC
• Chapter 6 – Functional Requirements

Chapter 1 – Introduction

Defines the purpose, project overview, scope, objectives, assumptions, constraints, technology stack and roadmap.

Chapter 2 – Business Analysis

Documents the business vision, mission, objectives, challenges, proposed solution, value proposition, KPIs, risks and product principles.

Chapter 3 – System Overview

Describes the platform architecture, modules, workflows, integrations, architectural principles and non-functional overview.

Chapter 4 – Stakeholder Analysis

Identifies all stakeholders, responsibilities, interaction matrix, priorities, communication channels and stakeholder journeys.

Chapter 5 – User Roles & RBAC

Defines roles, permission model, registration wizard, unified identity model and security boundaries.

Chapter 6 – Functional Requirements

Documents the MVP functional modules including authentication, events, ticketing, payments, QR tickets, customer portal, vendor portal, partner portal, CMS, analytics, notifications and administration.

Architectural Decisions

- ADR-001 PostgreSQL
- ADR-002 Prisma ORM
- ADR-003 Radix UI
- ADR-004 Registration Wizard
- ADR-005 Payment Provider Abstraction
- ADR-006 Unified Identity Model
- ADR-007 Domain-Driven Modular Architecture

Next Phase

Part II will cover the engineering design: System Architecture, Database Design, API Specification, UI Design System, Security Architecture, Deployment Architecture and Engineering Playbook.
